Delivering the difference

# Delivering the difference

From offices, conference rooms and fitness areas to sleeping cabins with intranet access and satellite television. The permanent facilities on our multipurpose vessels make them ideal for offshore accommodation.

Our vessels have the capacity to provide a comfortable stay for up to 469 persons in any offshore environment. Our accommodation vessels are equipped with the most advanced Dynamic Positioning system. This DP3 system keeps the accommodation

vessels connected to both FPSO and fixed production platforms twenty-four hours a day, under the most challenging conditions. Hydraulic heave compensated gangways provide a safe passage to work every day. The overall gangway connectivity rate of Sea Trucks Group is exceptionally high.

Our vessel have large crane capacities (combined with considerable boom length) as well as large deck space. This combination allows a large area for storage and fabrication works on-site of modules and materials up to the platforms and FPSO's.

## CAPACITIES

# Extra accommodation capacity

The large deck space on our fleet allows us to expand the accommodation capacity up to ~ 675 POB, using either a Portable Accommodation Block (PAB) or demountable accommodation units, owned by Sea Trucks.

The additional temporary accommodation could comprise a range of sleeping units, as well as workspace modules, including offices, laundry, changing room, galley, mess and workshop units. All units can be customized to suit the needs of any project.
