

PROJECT DATA SHEET

GIRASSOL PROJECT

OFFSHORE BLOCK 17, ANGOLA
GIRASSOL FIELD, ANGOLA

Jascon 30 at Girassol FPSO

PROJECT OVERVIEW

- **Location** Offshore Block 17 Angola
- **Field waterdepth** 1400 m
- **Contract period** January 2009 – February 2010
- **Value** 100 M USD
- **Vessel** *Jascon 30 / Jascon 28*
- **Description** Accommodation and Hook-Up services

Sea Trucks Group was awarded a contract from Total E & P Angola to supply a DP-3 accommodation barge with a heave compensated gangway for accommodation of 150 persons and a storage facility of Block 17 for a firm period of one year and two optional periods of one month each.

The accommodation unit remained permanently on DP mode alongside Girassol FPSO on Block 17. During the whole period the DP accommodation barges did not face one hour of downtime. The accommodation units, works and services were in accordance with international standards (MARPOL, SOLAS, ISM, ISGOTT) and professional recommendations of relevant international and local authorities.

As of 26th September 2009 the Jascon 30 was swapped with Jascon 28 in order to be mobilized for a pipe lay job in Nigeria. The project was successfully completed at 3rd February 2010.

The Girassol FPSO field development project includes 39 subsea wells, 45 km flowlines, 29 km injection lines and 70 km umbilicals
